

**R E M A R K S**

The above amendments to applicants' specification and claims are made to correct various typographical errors and more clearly distinguish applicants' claimed invention over the prior art identified in the Information Disclosure Statement and the Petition to Make Special filed with the subject divisional application. No new matter has been added.

The new paragraphs added to page 18 of applicants' specification describe how applicants' claimed invention overcomes the problems encountered with the prior art knockdown members utilizing original FIG. 9 of the application drawings but with reference numerals added to track with the new paragraphs. Support for the explanation set forth in the added paragraphs to page 18 of applicants' specification appears in applicants' original specification. No new matter has been added.

Favorable consideration of applicants' claims 7-31 as now presented is earnestly solicited.

Respectfully submitted,

WELSH & KATZ, LTD.
